

Creating an Arena

Map Creation

Map creation follows the same steps as outlined in the BattleArena [Map Creation](#) documentation. For ArenaPaintball, you will use the **/paintball** command to initiate the map creation. No additional steps are needed from this point forward.

Configuration

The default configuration for Paintball can be found in **plugins/ArenaPaintball/arenas/paintball.yml**. This can be modified in any way. See the [Arena Configuration](#) page for more details.

Additionally, configs for other paintball modes can be found [here](#).

Actions

- **give-paintball:** Gives the player a paintball which is configured in the ArenaPaintball config.yml.
 - Syntax: give-paintball{paintball=<paintball>;amount=[amount]}
