

Getting Started

VirtualPlayers comes with an API which can be used by developers. Follow the steps below to add the API as a dependency.

Adding the BattlePlugins Repository

Gradle (Kotlin DSL)

```
repositories {  
    maven("https://repo.battleplugins.org/releases")  
    maven("https://repo.battleplugins.org/snapshots")  
}
```

Gradle (Groovy)

```
repositories {  
    maven {  
        url "https://repo.battleplugins.org/releases"  
    }  
    maven {  
        url "https://repo.battleplugins.org/snapshots"  
    }  
}
```

Maven

```
<repositories>  
  <repository>  
    <id>battleplugins-releases</id>  
    <name>BattlePlugins Releases</name>  
    <url>https://repo.battleplugins.org/releases</url>  
  </repository>  
  <repository>  
    <id>battleplugins-snapshots</id>  
    <name>BattlePlugins Snapshots</name>
```

```
<url>https://repo.battleplugins.org/snapshots</url>
</repository>
</repositories>
```

Adding the Dependency

Gradle (Kotlin DSL)

```
dependencies {
    compileOnly("org.battleplugins.virtualplayers:api:3.0.0")
}
```

Gradle (Groovy)

```
dependencies {
    compileOnly "org.battleplugins.virtualplayers:api:3.0.0"
}
```

Maven

```
<dependencies>
<dependency>
  <groupId>org.battleplugins.virtualplayers</groupId>
  <artifactId>api</artifactId>
  <version>3.0.0</version>
  <scope>provided</scope>
</dependency>
</dependencies>
```
