

# Potion Effect Format

BattleArena has an potion effect format that is used for in both creating items and applying effects to players.

## Effect Options

Name	Description	Type
duration	The amount of time (in ticks) to apply the effect for.	<number>
amplifier	How strong the effect is.	<number>
ambient	Whether the effect is ambient (less intrusive)	[true false] (default: false)
particles	Whether the effect should show particles or not.	[true false] (default: true)

## Examples

```
events:
  on-start:
    - give-effects{effects=[speed{duration=300;amplifier=1},jump_boost{duration=300;amplifier=2}]}

...

events:
  on-respawn:
    - give-item{item=splash_potion{effects=[speed{duration=300;amplifier=1}]}}
```
